

L O N D O N
ALMANACK

For the Year of Our Lord, 1696.

For the Year of the World, 5696.

And of His Majesties Reign, 8.

Containing

- I. The Change and Quarters of the Moon.
- II. The Moon's Rising, Setting and Southing.
- III. The time of High Water at London-Bridge.
- IV. The exact High Water in 110 other Ports.
- V. The Regulation of Pendulum Clocks & Watches.
- VI. The Mutual Aspects of the Planets.
- VII. The Roman Account fitted to Our Months.
- VIII. The Sun's Rising and Setting every Day.
- IX. The Length of the Day and Night.
- X. The Increase and Decrease of the Days.
- XI. Physical Observations in each Month.
- XII. The Eclipses of the Luminaries.
- XIII. The true Dignities and Debil. of the Planets.
- XIV. The Doctrine of Mensural Directions.
- XV. Astrological Observations with other things of material Consequence.

Dedicated to the KING's most excellent Majesty.

By **WILLIAM SALMON**, Professor of
Physick, living at the Blew Ball by the Ditch-side, near
Holborn-Bridge, **LONDON**.

L O N D O N,

Printed by **W. Horton** for the Company of Stationers, 1696.

The ALMANACK Explained.

I. Under the *Festivall Days* you have the *Changes and Quarters of the Moon*; wherein, the number signifies the hour: *M. Morning. A. Afternoon. N. Night.*

II. The fourth Column on the left hand Pages shews every day in the year, how many minutes and seconds a pendulum Clock or Watch goes too fast, or too slow. Example. On the 10 of March the Pendulum will go 7 m. 28". too fast; On the 10 of May 2 m. 5". too slow. But then the Clock, &c. is to be set exactly to the true time, on the 4 of April; or 6 June; or 21 August; or 13 December; because on those days the Equation is just nothing.

III. Under Sun rising and setting, the minutes are in the middle: Example, On the 10. of January you find 7 50; which shew the Sun rises 50 min. after 7 in the Morning, and sets 50 min. before 5 at Night.

IV. In the Column of the length of days and nights against the 10 of March, you find 14 36 43, which shew the day is 14 h. 36 min. long and the night 13 h. wanting 36 m.

V. To find the Ho. of the Sun by the shadow of the moon on a Sun-dial at the Hours and min of the Moon Southing to the time of the shadow on the Dial, the Sum (abating 12 H. where it may be) is the true time of the Night.

An Account of the Author's Books.

- I. Pharmacopœia Lond. The new London Dispensary, Oct.
- II. Doron Medicum, Or a Supplement to the new London Dispensary, Oct.
- III. Pharmacopœia Batavica, or Bates's dispensatory, Oct.
- IV. Officina Chymica, Or Body of Chymistry, now in the Press. Oct.
- V. Medicina Practica, Or Practical Physick: to which is added *Remedia Galilæi, Geber, Arctius, Flathel, Bacon, Ruysey* in English. Octavo.
- VI. Sepiasium, The English Physician, or Druggist's Shop opened, Oct.
- VII. Polographice, The Arts of Drawing, Engraving, Etching, Limning, Painting, Colouring, Washing, Gilding, Varnishing, Dying, Beaming, and Perfixing, &c. the fifth Edition. Octavo.
- VIII. Patenteremata, Or select Physical and Chyrurgical Observations. Oct.
- IX. Systema Medicinale, Or a complete System of Physick. Octavo.
- X. Phylaxa Medicinæ, A Cabinet of choice Medicines, both Paris. Oct.
- XI. Iarrica, seu Piaxi Medensci, containing near 200 practical Observations of mephitæ. Quarto.
- XII. Synopsis Medicinæ, or a Compendium of the Theory and Practice of Physick. The most Compleat thing of that kind in the World. The 2d Edition. Oct.
- XIII. Ars Chirurgica, shewing, 1. The Operations. 2. Of Dissection. 3. Of Tumours. 4. Of Wounds. 5. Of Ulcers. 6. Of Fractures. 7. Of Dislocations. A Compleat Work. Oct.
- XIV. Ars Anatomica, The Anatomy of Humane Bodies, reformed by modern Discoveries. Now in the Press. Octavo.
- XV. Horæ Mathematicæ, now out of Print, but designed for the Press again, with large Additions, Numerical, Geometrical, Astronomical, &c. Octavo.
- XVI. Collectanea Medica, The Country Physician, or Chuse Collection of Physical things, fitted for vulgar use. Oct.
- XVII. Sydenham's practice of Physick, Translated into English with large Additions. Anatomical, &c. T.O.

To the High and Mighty Monarch,
W I L L I A M the G R E A T,
King of England, Scotland, France, and Ireland, &c.

Great Sir, &c.

Your Royal Presence now with Tears we greet,
With Grief we now we prostrate at your Feet,
Our *QUEEN* alas is lost, Our God did spread
A Vail of Clouds about her Royal Head.

Tho in her Life we might of Favours boast,
We can't now sing, who have that Treasure lost,
In Mournful wile we sit, Disconsolate,
Under sad pressures of our bitter Fate.

Fountains from our sad Eyes, of Tears we shed,
Whilst on the humble Earth we make our Bed.

Once wert'st my sad Soul ye pow'rs Divine,
For now 'tis Grief, like this sad Grief of mine.

Now that past is, though this concerns not you,

The *Pop.* and *Towns* are griev'd with our pain.

Forther we Weep, Our Weeping Eyes declare,
How great he was to Us how good, how dear.

Who now shall Balm thro' our Wounds apply?

Or give to Life, who ready are to dye?

Who shall our state thus desolate restore?

Who is't can happy make us as before?

'Tis he who sav'd us from th' *Anged* Foe,

And did to you Great Sir, his Mercy show,

Who from *Egyptian* Bondage did redeem,

His Holy people, by his outstretch'd Arms.

Sign'd a Release from the *Egyptian* Chain,

And all their Tribes brought safely through the main.

Who made the Rocks supply his Peoples want,

And gave them Oil out of the *Adamant*.

'Tis he that must the Remedy Apply,

And say now Live, you shall not surely dye.

He gives you Sir, a pow'r to reinstate

And by your might, turns back the Wheels of Fate.

We ate your Servants, and our all we stake,

Our very lives we offer for your sake.

Since your Commission thus is left at large,

With Courage Sir, pursue your mighty Charge.

Whilst we on humble Knees Our God entreat

His Mercies and his kindness to repeat.

To keep you safe as his peculiar own,

And on *External* Pillars fix your Throne.

These are the Earnest Prayers of Your Majesties

most humble and Faithful Subject and Servant,

W. SALMON.

Botanologia, Or a Compleat English Herbal in III. Books. Containing
 I. English Herbs and Plants. II. English Trees and Shrubs. III. Exoticks
 or Outlandish Drugs, so many as are commonly used in Physick. The whole
 Complemented with about 1500 curious and large Cuts, being the Icons or Figure
 of each Plant, together with 1. The various Names in Arabick, Greek, La-
 tin, and English. 2. The Kind, or Species. 3. The Description. 4. The principall
 Differences. 5. The Places of Growth. 6. The time of Flowering and Seeding.
 7. The Temperature, Properties, and Appropriations. 8. The Specification
 9. The Preparations. 10. The Virtues and Uses. Chymically designed and medi-
 cinally applied to all the various Preparations. In Folio. By W. Salmon, Author
 of this Work. It is now in the Press, and will be expedited with what speed may be
 To be sold by W. Battersby, at Thavies Inn Gate Holborn. It is a great Work,
 and proves tediouser than was expected, the Cuts prolonging the time, not being
 all finished, but it is hastned with the greatest industry imaginable. It was de-
 signed to have been published before now, but some unthought of Accident, has
 retarded it for a while longer, however it may be expected some little time hence.

Add the H. and M. of the D's Southing to the H. and M. in this Table, (casting away 12 H. if the Summ exceed,) and you have the true-time of Full Sea.

The Virtues and Uses of the BALSAM de Chili.

1. It is without doubt the most precious of all Natural Balfams, by reason of its Specifick properties, and Admirable Odor, surpassing all others even the most fragrant, curing many Incurable and supposed Incurable Diseases.

2. It cures all pains in any part of the Body coming of Cold or Wind, chiefly pains of the Stomach, Comforting and Strengthening it, after a wonderful manner: it Cures Ulcers of the Breasts and Lungs, Reins, Bladder, or Womb, inward Bruises, Spitting Blood, shortness of Breath, Coughs, Colds, Asthma's, Whoezings, Hoarseness, and other Diseases of those Parts.

3. It heals all manner of Green Wounds, old running Sores, Rotten Ulcers, Fistula's, in any part of the Body; as also Runethings, and other kinds of the Nerves and Tendons; Aches, Pains, Lameness, Weakness of the Limbs or Joynts, being drop'd into the Wound or Puncture, or otherwise applied thereupon, with a Tenu Linnen, or Leather, &c. and so bound up and not stirred in 24 Hours, it commonly Cures Wounds as Two or Three times shewing, and sometimes at the first dressing, though they be deep, confused and high.

4. It dissolves Gravel and Stoney Concretions, in the Reins, Urtery, and Bladder, and expels Sand, Shingle, and other things, which obstruct the Urine, or stop up its passages, for which purpose, there is scarce a better medicine.

5. It cures all Colick pains, Gripings, Wind in the Stomach and Bowels, and Cures all Fluxes, Bloody Fluxes, Excoriations, and other Discomposures of the Guts: it helps Barrenness, promotes Conception, causes ease and speedy Delivery to Women in Travail, taking it daily, and preventing after Pains.

6. It is good against the Falling Sickness, Apoplexy, Convulsions, Lethargy, old Head aches, Megrims, Vertigo, and most Cold and moist Diseases of the Head, Brain, Nerves and Womb, strengthening the Brain, Confirming the Memory, and fortifying all the Senses both Internal and External; being taken inwardly, as after directed, and outwardly anointed upon the place: a Drop or Two put into the Ears, helps thickness of Hearing, pain and noise is a Wonder.

7. It is an assured Remedy to Cure the Palsie, (if not inveterate) as also Tremblings, and Gouts of all sorts in any part; Weakness of the Nerves and Joynts, coming of a Cold and moisture, taking it inwardly, and anointing the parts outwardly therewith Morning and Evening for some time. It is one of the greatest Medicines that is, for the Cure of the Palsie and Gout, it transcending all other Medicaments whatsoever.

8. The Dose is from half a Dram to a Dram and half or more, or from 10 Drops to 30, or 40 Morning and Evening. The way of taking it is thus, Grind the quantity you take with a little of the Yolk of an Egg and Sugar, very well, to open its Body: this done mix it with a draught of White Wine, Mead, Ale, Beer, or posset-drink, (which the patient best likes) and so let them drink it.

It is only to be had, at the Author's House, at the New-Bell by the Duch-lid-
near Holbourn Bridge LONDON. Price 2 Shillings the pound, or 15 pence
the ounce.

January hath XXI days.

With beat and life Divine, inspir'd I sing,
A Panegyrick to our mighty King.
In Raptures and high flights, in lofty stile,
The praise of our Great Nassau I compile.
Before whose Face, no Tyrant force can stand,
But Trembling bow before his Conquering hand.

January 1696

Among Apollo's throng I'm bold to crowne
And our restorers praise to sing aloud
As he decree's I must be, or Peace or War,
For like the Wise he governs too the Stars,
His brighter Glories now my muse display
Since he transcends the Triumph of this day.

I. For a Cough, Cold, or Consumption.

Take Turnep thoroughly in an Oven
press out the Juys, which fresh
through a flannel to a quart of Wine
add good Brandy half a pint, and
with two pounds and half of London
refined Sugar make a Symplice to be
serving only: give a Spoonfull
when the Cough comes on the patient
and 3 Spoonfulls morning, noon and
night, in case of a Consumption.

II. For want of Appetite, Cold
Stomach, &c.

Take treble refined Sugar in
powder 3ij. strong Distill'd of camomile
Wormwood, 3ij mix them, then
with a strong Mucilage of Gum
Tragacanth made in Damask Rose
water, make a pisse by beating them
in a Mortar, adding Musk gr. iij.
if you like please then make it up into
little Cakes as big as a 6d. which lay
upon plates and gently dry them in an
Oven of which eat one now and then
as occasion requires.

III. To cure a Tetter or Ring
worm, &c.

Take ʒi. Sij. Oil Olive, Slop
Sun, of each ʒij. Redprecipitate ʒij
mix them well, and anoint them there-
with.

February

February hath xxix days.

You need not Str, an where Conduet crave,
 Whose matchless Soule bespeaks you bold and brave.
 Nor have you need of any other Guide,
 Since you have done, what none durst do beside.
 You as the Boyne gave such an overthrow,
 As Conquer'd a whole Kingdom at a blow.

February 1696.

What you designed, you never did delay,
Nor to the next, but off the present day.
All your great Aft, with wonder do surprize,
Your prudent Conduct, speaks you great and Wise,
A foul all Life, all Spirit, Flame, desire,
Fill'd with Eternal breath, with living Fire.

I. To cure a Consumption, & of the Lungs.

Take Juyes of F. & Gloves, Cloves
Honey, of each 6 pounds: melt
and clarify it with whites of Eggs
and keep it for use: it is proved
with Medicines, also, brought over-
ing, out 4 in the Afternoon, and at
Night, for a month or 6 Weeks to-
ther, or more. It cleanses, heats, and
restores flesh to a Miracle.

II. To take away Pains, & Swellings
from the Eyes.

Take Honey, Turpentine, Cloves,
each 4 ounces: melt, & clarify
Sarcocol in fine powder, of each
drachm 4: Lapis Lazuli, prepared
mix them well together, and put
into the Eyes every Night going to bed
and every morning, as soon as you
Rising.

III. A Clove to make the Body
Soluble.

Take Pfeffer-drink, or Mustard, fresh
pint, beaten sugar of Candies: mix and
give it warm: then, it will be
breath the better, if you mix with it
Sugar too for drachm of Oil of Aniseeds,
or Oil of Fennel Seed, 1 ounce.

March 17th 1701 days.

Such proof you in the Lunden Barrell gave,
As thrice Ten Thousands set unto their Grave,
Their Valliants fell, they fell among the Dead,
Before the Night, her sable Wings had spread,
Thus they into their lasting Sleep descend,
Go Earth to Earth, and in Corruption end.

April hath xxx days.

It is the Mighty Tyant you oppose,
And in a just revenge pursue our Foes,
Whom you by your Sword's point, and open War,
Send soon into the Regions of Dispair,
With your soft Charms, you Enemies do bind,
But in your frowns, their long fear & Death they find.

April 1696.

And though your Mercy knows indeed no bounds,
Repeated Crimes, repeat deserved Wounds,
Horror invades, in their pursuit of light,
They go to Death, Confusion, endless night,
To'th Place, where all in Dismal silence reign,
To'th Dark Abyss, from whence there's no return.

of Urine.

Take powder of Winter Cherry
scraper powder of Hog-lies dryed
grains mix them with a little
any way is, drinking after it
wine of parsley, or biting
water.

3. For a Vehement Cough and
Cough.

Take Amber bits or in gross
der, put it upon a little
burnt Charcoal, over a
funnel, through which receive
sumes into your Mouth and Throat
this do often.

May

May hath xxii days.

Your Scepter shall be mighty ones Command
 Your Throne does on Eternal Bases stand
 Your Land shall prosper in th' Exult of Peace
 Your Riches with your Glory shall encrease
 Your Lawrells Green, with Joy our God will bless,
 And Crown your Honour, with your good success.

May 1696.

Where Lenuives will do no good, but Kill;
 You Corrosives into the Wound distill:
 And fighting the fond Luxuries of State,
 You, with Your Sword, end all the Great Debate!
 Thus You with many Deaths Unconquer'd, Strive,
 And their slain Hundred Thousands still survive.

Physical Receipts

I. For a stitch in the side & cold to cause one to sweat.

Get a fair large Warmingstone, a foot in length, 6 Inches in breadth, and 4 inches in thickness; heat this by the fire side, then wrap it up in a cloth, and apply it to the side as hot as can be endured. It will keep its heat near 6 hours, and put the whole Body into a pleasing sweat.

II. To cure the Green-sickness.

Take filings of Iron turned into rust, with water in which Salt of Tartar is dissolv'd, one ounce; Anniseeds, Nutmegs, Ginger, Cardamoms, of each half an ounce: all being in fine powder, add double-refin'd Sugar in powder 3 ounces, mix them. Dose, one dram morning and evening: stirring after it in the Morning.

III. An Incomparable Ointment for any Cold, Ache, or Pain in any part.

Take Sheeps suet 8 ounces, Oil of Olive 4 ounces, Wax, Turpentine, of each 2 ounces, mix them well together; then add thereto Chymical Oils of Amber, Anise, and Rosemary, of each 2 drams, mix them well; with which Anoint Morning and Evening.

B

June

June hath xxx days.

*Your Enemies You put unto the Rout,
Disarm the Valiant, Terrifie the Stout:
The Nerves of Empire break, and in an Hour,
Tyrants despoile of their Tyrannick Power.
Their Fastnesses and Measures You Remove,
And give them Laws; their Breach of Faith Reprove.*

June 1696.

At Dynse, and Oxenbridge, Lewis Brake his Word.
 But with Dishonour he Tour-Men Restor'd.
 Bouflers, the Burn-Town, can this Truth Attest you met
 Who, unexpected, met with Tour Arrest.
 Both Mean, and Base, the Tyrant does Appear,
 Who has no Grace or Vertue left, but Fear.

July hath 31 days.

Whilst Thou art sweet & man, We no danger fear;
 We nothing dread, whatever does appear.
 We fear not now, what Man can vainly do;
 God is our Refuge, and our Safeguard too.
 Under his Banner Thou the Battel Fight;
 They shall o'recome, who in his Law delight.

July 1666
 1666 XXXI MDCCLXVI

The Proud shall bow, the Lofly, as 'tis meet,
 Shall lower fall, as Footstools at your Feet.
 Let us Rejoyce, this day our Mirth commands;
 Let us give Thanks, lift up our Voice, our Hands:
 Let us joyn both, whilst Nassaw's Praise we Sing;
 Nassaw the Great, the Valiant, and the King.

Physick

I. An Artificial Balsam, which Cures New-made Wounds as quick Dressing.

Take Oil-Olive 2 pounds & half, Bees-wax a pound; mix and melt; to which add, Liquid Storax, Gum Elemi, Frankincense, Scotchburgh Turpentine; of each 6 Ounces; Chymical Oils of Anise, Mint, Carduus, Fennel, Juniper, Rosemary, Sassafras, Savin, of each half an Ounce, mix them. Is one of the Noblest Balsams in the World.

II. For a cold Stomach, and to cause Appetite; R. Barbadoes Green Ginger a pound, cut it into bits, and beat it in a Marble Mortar to a pulp, to which add Pulp of Tamarinds 4 Ounces, Caraway, Cloves, Nutmegs in fine powder, of each one ounce, mix them together and make an Electuary; Take a bit of it now and then upon a Knives point.

III. To search, cleanse and heal an old rotten Ulcer.

Take Resinow, Scammony, in fine powder, 10 Ounces; Aloes in fine powder half an Ounce, mix them, and spread the powder upon the Ulcer, above which lay a Plaster of Diapalme; Dress it twice a day, and the Ulcer will quickly be whole.

August hath xxxi days.

Thus we see Times for Love, and Times for Hate;
 A Time for Peace, and Time to make Debate;
 A Time of Folly, and a Time of Wit;
 A Time of Lofing, and a Time to Get.
 A Time for Monsieur's Fall, to be Despoil'd,
 Who, in his Rebell Heart, has God Revail'd.

August 1696.

He may, for Refuge, to his Armies Fly,
Whilst God, against him, turns the Victory;
And Trust in Forts, which yet he must Defend,
Whilst You, Great Sir, on 'th Mighty God Depend.
We need not study how to make Report,
If we consider who assists each Part.

September

September hath xix days

When through the Raging Sea, God made Your Way,
And through the Deepes he bid You stop nor stay;
In Number Few Your Men, Your Troops were small;
And standing in Your Way a Brazen Wall:
When Winds and Tides at first seem'd to resist;
He bid You still persue, and still persist.

September 1696.

When You Tour handfuls Landed on the Shore,
 Tour God went with You as he did before.
 And tho' to Humane sight, no way was seen,
 He sent a Cloud before You as a Screen.
 Prepar'd your Path, sent Fantoms to affright
 The Fearful King, Dread Visions in the Night.

Physical Recipe's.

I. To stop Vomiting.

Take a Spoonful of Juice of Lemons, to which put half a dram of Salt of Tartar, and mix them with 4 Ounces of Mint-water for a Dose.

II. Another for the same.

Take White Port Wine 6 Ounces, Strong Tincture of Cloves half a Spoonful, mix them for a Dose, it will stop the Vomiting presently.

III. Against fainting Fits.

Give the Patient an Ounce of Our Cordial Spirit, or Balaartick-margaralens, or, in stead of them, an Ounce of strong Angelica-water, into which you may drop 20 drops of Spirit of Marshmallon, or Spirit of Salt-ammack, making the Patient also swallow the same.

Compendium Anatomicum nova Methodo Institutum. Vbi Anaptica capitibus & divisionibus ita illustratur, ut omnia uno quasi intuitu conspiciantur, & eo facilitate deinceps retineantur. Authore Johanne Caele, M. D. Sold by the Booksellers of London.

October

October hath xxxl. days.

His Spiritus fail'd, he Fled when none Pursu'd;
 Thus You with Ease, the Mighty Ones subdu'd.
 The Royal Army Fled, and gave You Place;
 They Fled with Terror, Fear was in their Face.
 And thus One Man, a Thousand Men did Fright,
 And Two did out, Ten thousand to the Flight.

October 1696.

You March't on still, without controul or stay,
Your Guide that did Direct, did clear the Way.
Such Peaceful steps, God made unto the Throne,
And thro' Great Dangers sav'd You as his own,
Dispell'd the Threatning Tempests of the Air,
Before his Son of Thunder and of War.

Physical Receipts.

I. For the Tiles before and after they are broken.

Put into a Close Vessel, a Quart of Oil of Live-Chancle, upon which put some little bits of Amber, and let the Patients sit over it 3 or 4 times a day, a quarter of an hour at a time, or more.

II. To make a Liquor which will draw forth the Effluvia and Virtues of any Herb or Plant immediately.

Take fair water 3 quarts, Pot-ash 1 pound, Sal. armoniac half a pound, Mix, Digest, close stop 3 days, then filter and is good for use. This Liquor of it self opens all Obstructions, and extralls the Virtues of any Herb or Plant cold, in half an hour, which may be given from half a dram to 2 drams, in any proper Liquor. It is a most Excellent thing.

III. To stop any Flux of Blood in any part, or Fluxes of the Belly, Womb, or Humors.

Take the best Black, or Liver-colour'd Japan Earth, in fine Powder, six Ounces, Chiole Brandy a quart, mix and make a Good Red Tincture. Dose one Ounce Morning and Night in Ale or Wine.

November

November hath xxx. days.

What Tyrant Lewis got beyond the Maine,
 You soon oblig'd him to return again :
 What he obtain'd by Craft, and Golden Charms,
 You made him to Refund by Force of Arms.
 At Namur You the World a Taste did give,
 How You in Glory Reign, and Honour Live.

November 1696

Th' Impregnable, as Monsieur seem'd to Boast,
Did, as Submissive, Bow; and so was Lost.
You did the Place but with Your Arms Invest;
And, on the French Return'd their Foolish Jest.
Who came to see the Town and Castle Won;
Stood with an Hundred Thousand and lookt on.

December 2696.

Our God Removes the Mighty from their Thrones,
And turns strong Cities into heaps of Stones.
Thus Justice to the Earth returns again,
Under the Shades of Your Auspicious Reign.
I've finish'd now, my Work is to Obey;
And, at Your Feet, these humble Lines to lay.

An ADVERTISEMENT.

WHereas one John Hollier Publishes and pretends to Sell Salmon's Family Pills, under that Name, Effigies and Seal, in many Places of this Kingdom for 12 Pence a BOX: This is to give Notice to all Persons whatsoever, That he assumes my Name, Effigies and Seal, doing it without my Privilege, Allowance, Order or Consent (to my great Prejudice and Damage:) And that I write as the Author of the said Family Pills, do both now, and shall for time to come, sell the said Family Pills only for 9 Pence a BOX, I have also made several Alterations and Improvements of the Medicine for the advantage thereof, of which Hollier knows nothing, neither as to the Names, Numbers or Natures of the things added or altered; the Preparation, Parts or Proportion of any thing contained therein. By reason of which Alterations, they neither Vomit, nor make Sick, or grieve the Bowels in the least; but work more nimbly and pleasantly than formerly, and without any the least danger, being fitted against the most Stubborn and rebellious Diseases, which no other Remedy can cure or help. So that I modestly affirm, That one BOX of these Pills, thus improved and advanced in Virtus and Goodness, are worth five BOXES (for all that I know Ten) of those which Hollier or any else make and sell without my Order in my Name. They are now to be had thus rightly prepared at my House, at the Bléw Ball by the Ditch-side near Holborn-bridge, London. Where all such as desire to have or sell them, or my Family Poudet or Elixir, (of which Hollier knows nothing at all) may have them (the Pills at 9 d. a BOX, the Poudet at 6 d. a Paper, and the Elixir at 3 s. 6 d. the Glass) and with the Allowance for selling: of which all such as are concerned in their Sale, are hereby desired to take notice.

The World is also desired to remember, That the Advertisement which Hollier, or some of his Accomplices, has put at the end of one of my late published Books, Entituled, *Select Physick and Chyrurgical Observations*, Printed for Thomas Passenger, on London-bridge, (whilst I was absent in the *West-Indies*) is a base, unworthy, and malicious Libel, designedly done to wrong and abuse the Author, and to my very great Prejudice; for that I sell large quantities of all sorts of my Medicines with my Wife, to be sold in my absence: nor did I ever give Hollier, or any else Leave, Order, or Directions to do the same, much less to publish that Malicious Advertisement.

I should have been so free as to have declared to the World the present Composition of my Family Pills, as also of my Family Poudet, and my Elixir, had I not met with such hard measure, and such an unjust and unworthy Treatment as aforesaid, and therefore humbly beg Excuse of the Publick for this concealment for a Season, till the Villany of ill Persons shall cease; not doubting, but as there is a time for all things, so a time may come for this their Publication.

The By-Laws of the Colledge of Physicians London, with a Catalogue of all the Doctors of Physick which have come forth from Oxford and Cambridge, from 1659, to 1694, and after what manner they came forth: Sold at the Printing-Press by the Royal-Exchange in Cornhill.

THE LONDON Almanack, For the Year 1696.

By *W. Salmon* Profefſor of Phyſick.

I. Of the Eclipses this Year, 1696.

1. **T**Here will be only two Eclipses this Year, and they will be both of the Moon; and both of them viſible in our Horizon, the Moon be totally darkned in both Deliquiums; the total continuing in both Eclipses for above an hour and half.

2. The first Eclipse will be on the sixth Day of *May*, near Midnight. It happens in $\text{M } 26^{\circ}$. near her North Node, and in the *Medium Caeli*, or Tenth House.

3. It is in the sixth Face of *Scorpio*, the Face of Harſhneſs and Churliſhneſs, of Subtilty, Craft and Deceitfulneſs: It is a Face of Miſchief, Miſery, Scorn and Contempt, and ſignifies very much evil to theſe Countries and Cities, under thoſe Degrees, and to thoſe Perſons who have that Face aſcending, or their Sun or Moon placed near the Degree of the Deliquium.

H. M. S.

4. The Beginning of this great Eclipse is P.M. 10 00 00

The Beginning of the total Darkneſs at 11 00 34

The Middle of the Eclipse 11 47 55

The End of the Total Darkneſs 12 35 25

The End or full Recovery of Light 13 35 56

The whole Duration of the Eclipse 3 35 56

5. The ſecond Eclipse will be on the 30th. of *October*, in the Morning. And happens in $\text{S } 4^{\circ}$ near the Moon's South Node, and in the Deſcendents, or ſeventh Houſe, which is the Houſe of publick Enemies, Strife, and Contention.

6. It is in the firſt Face of *Taurus*, which is the Face of Auſterity and Command, the Face of Seriouſneſs and great Reſolution. And as it ſignifies Women and Ladies of great, or the firſt Quality, ſo it ſignifies trouble to them, and an eclipsing of their Honour, Glory, and Grandure in the World, by ſome potent Adverſary, &c. It is evil alſo to thoſe Countries and People who have the ſame Aſcending, or their Sun or Moon poſited therein.

H. M. S.

7. The Beginning of this very great Eclipse, is mane	3 9 47
The Beginning of the Total Darknes	4 8 9
The Middle of the Eclipse	4 55 42
The End of the Total Darknes	5 43 15
The End or full Recovery of Light	6 41 37
The whole Duration of the Eclipse	3 31 50

8. There happens also a \odot H \odot in V 26° . which is the sixth Face thereof, and is the Face of Difficulty, Labour, and Travel, it will not pass without some eminent Transactions of Affairs.

II. Several Physical Receipts.

I. To make Spirit of Nitre, and Sal-Sulphuratum.

Take Nitre and Oil of Sulphur, of each a Pound, Flegm of Vitriol half a Pound: Powder the Nitre, and put it into a Retort, and put thereon the Oil of Sulphur and Flegm of Vitriol: Distill it in sand, so will you have a very good Spirit of Nitre, and a pure white sulphurated Sal Nitre remaining at bottom. This Salt cures all sorts of hot and burning Fevers, almost to a Miracle, quenches Thirst, and causes a good Appetite. Dose half a Dram or two Scruples in any convenient Vehicle, as Posset Drink, Broth, Julep, Wine, &c.

II. A Tincture out of the Vitrum or Flores Antimonii.

Take Red Flowers of Antimony, or the Vitrum in Fine Powder one Pound, rectified Spirit of Vitriol two Pound, mix and digest till they are well united: Abstract part of the Spirit; and then affuse thereon rectified S. V. which digest together, and extract a Tincture. This Tincture fortifies the Bowels, cheers the Heart, and revives the Spirits, restores the Tone of the Stomach, and is good against Fevers, Agues, Jaundice, Faintings, Swooning, Gout, Rheumatism, Hypochondrical Melancholy, and Hysterick Fits. It opens Obstructions, provokes the Terms, purifies the Blood, and prevails against the Dropsy and Scurvy. Dose a gut. 20. ad 40. 60. or more in a Glass of Wine, Morning and Evening.

III. An Ordinary Steeleed Wine.

Take Filings of Steel or Iron 6 Ounces, Bone-Ashes 10 Ounces, mix them; to which put choice Red Wine 2 Quarts, digest 2 Months, shaking the Glass once or twice a day, then let it settle. This opens all sorts of Obstructions, cures the Green-sickness in Virgins, and stops all sorts of Fluxes of the Belly. Dose two Spoonfuls at a time, at Night going to Bed, in a Glass of Ale or Wine, and to be continued as long as need requires.

It

It cures also the Bloody and Hepatick Flux with happy Success.

IV. Sir Kenelm Digby's Sympasbetick Pouder.

℞. English Vitriol as much as you please, dissolve it in a sufficient Quantity of warm Water, but no more than needs must: Decant the Dissolution, filter and evaporate till the Crusticle appears; then put it into a cool place, covering it, and let it shoot into fair, large, green Crystals; which take forth, and spread them in a broad earthen Dish, exposing them to the heat of the Sun in the Dog-Days, or when the Sun is hottest, turning them often, till the Sun calcines them white: When they are all white without, beat them into gross Powder, and expose them again to the Sun, securing them from Dust and Rain: Being all white again, powder it then very finely, and expose this also to the Sun, stirring and turning it often, till it becomes all a white Powder, which put up into a dry Glass and keep it close for Use. It stops bleeding at the Nose, or in any other part, as also the bleeding of Wounds to a Miracle: It also cures green Wounds (where there is no fracture of the Bone) without any Plaister or Ointment, by dipping a Cloth stained with the Blood of the Wound, and keeping it in it for some time Blood warm, though the wounded Person is many Miles off, the Patient in the mean while keeping the Wound only warm and clean.

V. An Ointment against Scabbiness, Itch, Herpes, Tettars, Ringworms.

Take double Aqua Fortis 4 Ounces, Spanish Quick silver 2 Ounces, mix the Quick-silver gradually and dissolve; then precipitate with strong salt Brine, being well sealed, pour off the clear Water, which keep by it self for use. Then take Sheeps Suet, pure Sallet Oil, of each half a pound, mix and melt them together; which done, add (whilst pretty hot) the former White precipitate, or remaining milky, thick Substance, letting them simmer a little over the fire to evaporate the moisture, taking them from the fire, stir them well together, till the matter begins to grow thick and cold, which put into a pot and keep for use. The Use. First wash the Place affected with the Water, as hot as it can be well endured, and then lay over Stuphs or double Cloths wet in the same, which do for two, three, or four Days or more, till it has well drawn forth the salt, fiery, and sharp Humour. and the part is very sore and inflamed with little holes, or Ulcers as it were eaten in: This done, anoint with the Ointment, as hot as it can be endured, and spread also a Leather with it and lay over all, dressing it twice a day. This will draw the Sore, and afterwards heal it up in a little time; and notwithstanding the

deep holes the Water seems to have eaten, yet no Scar, or the least Mark of them will be left behind. This Ointment is also good against red and inflamed Faces and Noses, Pocky Sores and Ulcers, Gums, Nodes, Tophi, and nocturnal pains in the Shins, &c.

III. Of the true Dignities and Debilities of the Planets.

1. **B**ECAUSE we are not satisfied with the received Opinions of the Dignities and Debilities of the Planets, for that they seem to be difsonant from Truth; but also length of Time, manifold Observations, and powerful Reason, make Offers to oppose the same, we thought good in this Place to make an Essay towards the Investigation thereof.

2. The Distribution of the Signs to the Planets is not wholly rational, notwithstanding the plausible Arguments which some Artists have rendered for it. Nor can we who have made Truth our only Mark to aim at, make our Concessions at that Station.

3. Why should a Planet who is hot and dry have one House of his own Nature, and his other of a quite contrary? Why should he who is cold and dry, have one of his houses cold and dry, and his other hot and moist? Why should a Planet who is by nature hot and moist, have one of his Houses hot and moist, his other cold and dry?

4. The Exaltations of the Planets are their Aphelions or Apogæums, the which though we believe them to be fix'd in Respect to the First Star of *Aries*, yet since there is a Precession of the Æquinoxes, and those points move backwards, (or forwards, if you so please) according to the same Proportion: Why should we believe the Dignity to be Stationary, and the Point it self Erratick?

5. The Debilities follow the Reason of the Dignities: For having truly found out their Lordships, or Houses, and Exaltations, the opposite Houses are naturally their Detriments and Falls, as by this little Table annexed does plainly appear.

6. For

♔	♂ ♀	♀ 4	♌
♕	☾ ☉		♎

The London ALMANACK, 1696.

6 For these and some other Considerations we have relinquished the old Dispositions of the Houses or Signs to the Planets, and instituted anew, according to this inserted Table; wherein you will find the House of the Planets limited according to the *Lords of the Triplicities*: And so every Sign has two Lords, to wit, a Superiour and an Inferiour, and every Planet is Lord of three Houses or Signs.

7. According to this Limitation, ♂ and ☉ are Lords of the Fiery Triplicity, ♁ and ♀ of the Earthly, ♃ and ♀ of the Airy, and ♄ and ♅ Rulers of the Watery.

8. The Superiour Lord is the principal Lord, unless the Inferiour Lord be upon the Cuspe of the House signifying the thing; or be in, or near a partial Aspect with the same; then (if the other be not so posited) the Inferiour Lord shall be first respected in Judgment, afterwards the Superiour.

9. If any one shall contend that *Venus* is cold and moist, and therefore ought to be joined in Domination with the *Moon*: To that we Answer, That both Reason and Experience have evinced the contrary; for since that heat and moisture are partly the Causes of Generation, how can she, which is the principal significatrix be of an opposite Quality or Nature?

10. As to the Exaltations of the Planets, they much differ from what has hitherto been received; for the old Exaltations were the Points of the Aphelions or Apogæum's, about the time of the *Creation of the World*, (which is indeed the highest Point of their Orbits) as we shall hereafter prove. Now there being a *precession* of the *Equinoxes*, there is a variation of these points, according to the quantity of that *precession*.

11. All the Planets (except the *Moon*, who is a secondary Planet) have their Aphelions limited or fixed in a certain Point from the first Star of *Aries*; so the Aphelion of *Saturn* is in 7 *Sig.* $28^{\circ} 30'$, The Aphelion of *Jupiter* in 5 *Sig.* $5^{\circ} 5'$, the Aphelion of *Mars* in 4 *Sig.* $1^{\circ} 12'$, the Aphelion of the *Earth* in 3 *Sig.* $8^{\circ} 20'$, the Aphelion of *Venus* in 9 *Sig.* $5^{\circ} 0'$, the Aphelion of *Mercury* in 7 *Sig.* $13^{\circ} 48'$.

12. Add to these Points the *precession* of the *Equinoxes* to the 1st of *March* 1700, which is $28^{\circ} 55'$ and you will find the Places of the said Aphelions or Apogæum's for the said Year 1700, (which may also indifferently serve even at this present time) which being the highest Point of the Orbits of the said Planets, may very rationally be accounted for their *Exaltations*.

The London ALMANACK, 1696.

7 28 30	8 8 20
0 28 55	0 28 55

13. The Moon being a secondary Planet; her Apogæum is not fix'd from the first Star of ♄, and therefore must be Calculated every month, (yea, every five or ten days, if you would be exact) by the help of the following Table; so that the Apogæum of Luna, for the 1 Mar. 1691, is in ♄ 27° 48' *ferè*, as by the Operation annexed you may see, compared with the Table.

14. These are the true Places of the Apogæums, or Exaltations of the Planets for the 1 March 1700. Now to prove that the Exaltations of the Planets, in the Old Table of Essential Dignities, were their Apbelions or apogæums at the Time of the Creation, is but subtracting the Quantity of the Precession of the Equinoxes, for 5700 years, (the Age of the World, Anno 1700 from the Places of the said Apogæums, for the said Year of our Lord 1700, and the matter will be evident.

15. The precession of the Equinox is about $50''$ in a year, or $1^{\circ} 23' 20''$ in a hundred years; which being computed for 5700 years (the Age of the World Anno 1700) amounts to $2^{\circ} 19' 10''$. This being subducted out of the aforesaid Apogæums, leaves you the true Apogæum at the time of the Creation, which was the then Exaltations of the said Planets according to the old Table of Dignities.

16. This Operation agrees near enough in all except ♀ and ♂: in which planets the transcribers of the said Table might be mistaken; for that Ptolemy from whom the said Table is fetch'd, saith, *that he found it in an old rotten, Worm-eaten Book, half consumed with Worms and Age; and that by reason of the so much decay of the said Book, it was scarcely legible, so that he could not wholly transcribe it.* Ptol. Quadrip. lib. 1. cap. 19. Text. 59.

17. The Force and Power of the Exaltation will be diffused many Degrees from the Apex or Point thereof, on both sides of the same; viz. 15. degrees both before and after the point exuperate, for the superiour and more ponderous Planets ♄, ♃, ☉, which is the Quantity of the Orb of the greater Luminary: And 12° both before and after the point ex-

The London *ALMANACK*, 1696.

perate for the inferiour and more light Planets \odot , \odot , \odot , which is the quantity of the Orb of the lesser Luminary.

18. The Reason of this Discrepancy, is taken from their height or distance from the Earth. For \odot , \odot , \odot , at 12° distance from the point Exuperate make full as large an angle at the Earth, as \odot , \odot , \odot , do at 15° distance: The difference between which Angles at the Zenith or Meridian, make no sensible Discrepancy upon Earth.

IV. *The Doctrine of Mensural Directions.*

1. **A**S the *Annual Directions* are taken from the diurnal Motion of the Sun, wherein every day from the day of Birth signifies so many years: so there are *Mensural Directions*, which are drawn from the diurnal Motion of the Moon, wherein every day from the day of Birth signifies so many Months.

2. Having drawn the Figure of the Nativity, into a Speculum, consider every Month Currant (accounting a day for a Month) what every Planet transits in the Speculum, and note the same: for they are the concurring directions of your respective Months inquired after.

3. And on the Right hand page of the Ephemeris, observe the Incidence of all the Aspects for the same days, and note them: Then, (if the Ephemeris be calculated for the Meridian of Birth, or any place near it) subduct the time of Birth from the time of the Aspects Incidence; the remainder is the Arch of Direction: which (allowing 1 hour for a Day, 6 hours for a Week or 7 days, 12 hours for 14 days, 18 hours for 21 days, and 24 hours for the whole 28 days) points out the exact time of the Directions, Power, and Force.

4. But if the Native was born, whether in the Forenoon or Afternoon; and the Aspect happening the same day, was before the hour of Birth, that Aspect is to be accounted as a direction of the preceeding day or Month; and therefore for the Ease of Supputation, account no Aspect or Direction in the Compass of the present Month you enquire about, but such as shall fall after the hour of birth: And as you begin your Month at the time the \odot enters the same point of Heaven she was in at Birth, so begin the day answering to the Month desired at the hour of Birth, accounting on to 24 hours or the same time the next Day. So that all Aspects or Directions which fall before the Hour of Birth are to be accounted as belonging to the preceeding day or Month.

The London ALMANACK, 1696.

5. If the Native was born some hours before Noon, and the Aspect or Direction happen some hours after Noon the same Day, you are to add the Hours of Birth before Noon to the time of the Aspect after Noon; the Summ is the time of the Direction.

Verbi Gratia. *The Native was born at 9^h in the Morning: The Aspect or Direction you enquire after, happens at 4^h after Noon: Here you are to add the hours of Birth before Noon, which are 3^h to 4. the hours after Noon, the Summ which is 7^h is the Arch of Direction, and signifies 8 Days from the beginning of that Month.*

6. If the Native was born some hours after Noon, and the Aspect or Direction happens some hours after Noon the same Day, you are to subduct the hours of Birth after Noon from the time of the Aspect after Noon, the remainder is the Arch of Direction.

Verbi Gratia. *Suppose the Native was born at 3^h P. M. and the time of the Aspect or Direction you enquire after happens at 9^h P. M. here you must subduct 3. from 9. the remainder 6^h is the Arch of Direction, and signifies 7 days from the beginning of that Month.*

7. But if the Native was born some hours P. M. and the Aspect or Direction you enquire after, happens the next day, and some hours P. M. but before the hour of Birth, subduct the hours of Birth P. M. from 24^h and the remainder add to the hour of the Aspect P. M. the next day, the Summ is the Arch of Direction.

Verbi Gratia. *Suppose the Native was born at 6^h P. M. and the Aspect or Direction you enquire after, happens at 3^h P. M. the next day: here you subduct 6 out of 24 the remainder, 18 you must add to 3^h P. M. The Summ 21 is the Arch of Direction, and points out 25 days from the beginning of your Month.*

8. If the Native was born some hours A. M. and the Aspect or Directions you enquire after, happens the next day some hours A. M. but before the hour of Birth: you must add the hours of Birth before Noon, to the time of the Aspects Incidence, the Summ is the Arch of Direction.

Exempli Gratia. *Suppose the Native was born at 9^h A. M. viz. 3 hours before Noon, and the Aspect or Direction you enquire after the next day at 17^h viz. at 5^h in the Morning the next day, which is some hours before the hour of Birth, here you must add the 9^h which the Native was born before Noon, to the 17^h the time of the Aspect, the Summ 26^h is the Arch of Direction, and points out the 23 days, from the beginning of your Month.*

The London ALMANACK, 1696.

9. If the Native was born at Noon, you have no Addition or Subduction at all to make, but the hours of the Aspects or Directions Incidence are without any more trouble, the true Arch of Direction sought after.

10. Now this is to be noted, that having made an Estimate of the Years of the Native's life, all the Directions happening every day, from the day of Birth to the end of the Days answering to that Estimate of Years, have a double measure of time: the first Annual from the diurnal motion of the Sun. The Second Mensural from the diurnal motion of the Moon. And being directed for the One, they serve, (without any new performance) for the other, varying only the measure of Time in the Arch of Direction, as your Reason will sufficiently direct you.

V. Observations on the YEAR 1696.

JANUARY.

WHAT hopes have we the Noise of War shall cease?
What hopes have we for the Insults of Peace?

Such hopes as may to Europe once restore

Its Freedom lost, and not long time before.

Such hopes as may the Tyrant's Fall presage,

And the Confederate Forces yet engage.

This is the Prospect we of things do take,

These are the Measures of the War we make.

Our God, we know, has our Deliverance wrought,

And out o'th' Net already has us brought.

To those perplex'd between both Hope and Fear,

Such Truths as these do but like Dreams appear.

FEBRUARY.

See Signs of Peace on th' European Stage,

Confederates still more firmly do engage.

The Preparations for the Peace more vast;

The War-like Stores to future Ages last.

'Tis only War can introduce our Peace,

'Tis only Arms can make the War to cease.

Our mighty Monarch 'tis; 'tis he alone,

Can Peace entail upon the English Crown.

'Tis only he, that can to Europe give

The End of War, and say to Peace, Now live.

This is what he does in his Might pursue,

And with his Storms, his trembling Foes subdue!

The London ALMANACK, 1696.

MARCH.

Our mighty Naval Preparations made,
Make now the Universal World afraid.
The Augmentation of our Force on Land,
Does force indeed the Coward *French* to stand.
The Rock is broke from which a Fountain goes,
And Rivers thro' our Desolations flows.
We who once were unto Destruction sold,
Are sav'd, as 'twas, in Ancient Saws foretold.
Unto the Lord in our Distress we cry'd,
He heard our Prayer, altho' his Face did hide.

{ Great is our God, and wondrous are his ways,
{ Just in his Word, and fearful in his Praise.

APRIL.

Whilst that our Fleets do thro' the Ocean fly,
The *French* like Cowards, keep their holes and die.
Thro' Seas of Trouble now our way is made,
This is the Day for which we long have pray'd.
The mighty God on whom we have rely'd,
Has humbled the *French* Tyrant in his Pride.
We now rejoice like those who Treasure find,
The Tyrant's Day is drawing to an End.
See how the Vermin flock unto their Shore,
Those whom the Tyrant's made both Slaves and poor.
But all they do is vain, in vain they stand,
'Gainst *Cesar's* Fleets by Sea, and Force by Land.

MAY.

The *British* Fleet in Triumph rides the Seas,
Thro' all the Oceans, we do what we please.
The Base and Coward *French* we sometimes fright,
And sometimes with our fiery Balls we smite.
Go forth you gen'rous Souls, go without fear,
Your God for you in Battel will appear.
The Day's your own, for God is in the Cause,
Chastize the Slaves who will obey no Laws.
The Greatness of our sacred King proclaim,
The fulgid Glory of his mighty Name.
A King that's with so fair a Title blest'd,
As never King on Earth the like possess'd.

JUNE.

The *French* Coast now in Dust and Ashes lies,
Their Glory's wounded and their Honour dies.
Cesar's Imperial Fleet the Way does lead,
His rampant Lyons on the Lilies tread.

The London ALMANACK, 1696.

No length of Time his Glory shall destroy,
But still triumph in the Insults of Joy.
They arm'd with Scorn and Courage find a way,
Thro' the proud swelling Billows of the Sea.
Thus does the *English* Grandure daily grow,
To our great King the Tyrant's Fall we owe.
In Desolations all his People mourn,
Heaven has decreed their fatal Overture.

F U L L

Ye Slaves of *France* give Ear, I will descry,
Your future State, and teach you how to die.
Fill full your hearts with Grief, your looks with Shame,
And tremble when you hear great *Nassau's* Name.
To *Dunkirk* haste be sparing for no Cost,
But as at *Namur*, look on till 'tis lost.
Your Doom is past, the fatal Sword shall shed
Your guilty Blood, and place you with the dead.
Your Tyrant King involves you in his Fall,
Peace has no Dwellings now within your Call.
Deluded thus your breathen God invoke,
Cry loud, to save you from the fatal Stroke.

A U G U S T.

Troops from the *Rhine* approach, from *Savoy* some,
There all, with joyal Consent together come.
They come to view and see their *Dunkirk's* Fall,
And like true Mourners, wait its Funeral.
Like Mists dispell'd our Fears are over-blown,
Our Terrour on the *Gallick* Coast is thrown.
The *English* and the *Belgick* Lions roar,
And make the slavish *French* to dread our power.
We fall on as we please; the Foe shall feel,
The matchless Force of our all-conquering Steel.
Thus Tyrants fall, who lately brav'd the Sky,
And from their Heights, in humble Dust they lie.

S E P T E M B E R.

Years, Months, and Days, their certain Courses take,
And fleeting Minutes Alterations make.
The present Junctures do our Cause advance,
'Tis Folly trusting to a future Chance.
The passing Moments have indeed no like,
'Tis Prudence, while the Iron's hot to strike.
No Art we'll spare, with an unwearied Mind,
We'll ever seek, till what we seek we find.
Destruction is at hand, let Monsieur fear.

The London ALMANACK, 1696

Tho' Tyrants dare blaspheme, our God shall make
The Rocks to bow, and the whole Earth to quake.

OCTOBER.

What God, O *Levi*, can thy Cause defend?
What Saint wilt thou solicit for thy Friend?
Tho' he may like to lofty Cedars spread,
And in his Pride, nod his ambitious Head:
Yet is his Fall decreed, and down he must,
And all his Glory lie in humble Dust.
The Sword shall hew the mighty Tyrant down,
And level with the Earth his lofty Crown.
Time his Idea's of Glory shall deface,
No Eye shall see th' Impression of his Place.
Thus shall the Idol be, and be no more,
This is the Fate of his Tyrannick Power.

NOVEMBER.

We trust no more unto deceitful Charms,
For sake our Strength or cast away our Arms.
We have no Faith in Monsieur's perjur'd Word,
But equal hold it, with his Tyrant Sword.
His Promises like Apparitions are,
Which always to delude the World appear.
This is the Sense we of his Honour have,
For to be false with him, is to be brave.
Tis fit therefore to arm against surprize,
To trust our own, and not anothers Eyes.
The Work is done, we in our Station stand,
We make no Peace but with our Sword in hand.

DECEMBER.

Near to this time some Overtures are made,
And Peace is fought by those that Peace invade.
But how can they be thought its Friends, who are
Th' Invaders of its Sovereignty with War?
And how can Peace subsist and dwell with those
Who ever were, and are its deadly Foes?
Perplexed Theam, not to be understood,
Without a greater Sacrifice of Blood.
Tis our Domestick, and with us it dwells,
And its rich Gilt, for Blood it only sells.
Thus ends the Year with Strife of Arms and Jure,
Peace bodes Appearance thro' the next Year's Wars.

I. **THE Family-Pills, and Family-Powder.** Both these Medicines are fitted for the Cure of the same Diseases, but the Pills work more gently; the Powder more strongly, yet both very safely, and may be given to Old or Young, whether Man, Woman, or Child, being given in a fit Dose. The Design of having both *Pills* and *Powder*, is this, That they who cannot swallow the *Pills*, may take the *Powder*; and they who cannot take the *Powder*, may make use of the *Pills*, they being universal Purgers. These famous *Family-Pills* and *Family-Powder*, are eminent for the Cure, not only of the afore-named Diseases, but also of *Agues*, *Green-sickness*, *Catarrhs*, *Head-ach*, *Lethargy*, *Rheumy-Eyes*, *Sinking-Breath*, *want of Appetite*, *Illness of Stomach*, *Stuffing at Stomach*, *Vomiting*, *Fluxes*, *Foulness of Stomach*, *Hard-drinking*, *Sea-sicknesses*, *Urine stop*, *Barrenness*, *Sciatica*, *Numbness*, *French-Pox*, *Gonorrhoea*, *Swellings*, *Lameness*, *Pain in any Part*, *Pustles*, *Wheals*, *Itches*, *Scabs*, *itch*, *Tettars*, *Ring-worms*, *Morpheus*, *Leprosie*, *Mange*, *salt Humours*, *all breakings out*, *Running-sores*, *old Ulcers*, *Fistula's*, *Faundice*, *King's-Evil*, *Worms*, &c.

II. Our *Elixir*. This our, *Universal Elixir*, we invented for the Sake of such as could not take our *Family-Pills*, nor *Powder*; it is indeed, a most admirable Medicine for the Cure of the *Scurvy*, *Dropsie*, *Gout*, *Faundice*, *Rheumatism*, *King's-Evil*, and *Worms*: and indeed may be given in any of the Cases, in which the said *Pills* and *Powder* may be given; besides which, this *Elixir* cures *Coughs*, *Colds*, *Asthma's*, *Shortness of Breath*, *Pitickets*, *Stiches*, *Pleurisies*, *Spleen*, *Mother-tits*, *Costiveness*, *Collick*, *Gripping of the Guts*, *Bloody-flux*, *Stone*, *Gravel*, *Strangury*, *Sharpness and Heat of Urine*, *Womens Diseases*, *Megrims*, *Convulsions*, *Melancholy*, *Frensie*, *Madness*, *Vertigo*, *Apoplexy*, *Lethargy*, *Palse*, *Falling-sickness*, *Trembling*, *Weakness*, *Dimness of Sight*, *Deafness*, *Consumption*, *weak Backs*, *Rickets*, *Green-sickness*, *Wind*, *Fevers*, *Calentures*, *Small-Pox*, *Measles*, *Poison* and *Surfeits*.

III. If any Shop-keeper in any Part of England, desires to Sell my *Family Pills*, or *Family-Powder*, or *Elixir*; they are only to be had rightly prepared by my own hand, at my House, at the *Blew-Ball* by the *Dutch-side*, near *Holbourn-bridge*, *London*, and no where else, with printed Directions for use. The Price of a Box of *Pills* is only 9 Pence; of a Paper of *Powder* 6 Pence, and of a Glass of *Elixir* 3 Shill. sending to me at my House
aforesaid,

ADVERTISEMENT.

aforesaid, they may be constantly had, and a proportional Gain shall be allowed for the Sale of each Particular.

IV. *Salmon's Cordial-Pill*, so highly approved, and effectually experienced for the Cure of all Aches, Pains, Gripings of the Guts, Cholick, Stone, Gout, Sciatica, Scurvy, Dropſie and Jaundice; Pains and Diſtempers of the Head, Coughs, Colds, Deſluxions, Rheum, Shortneſs of Breath, Difficulty of breathing, Hoarſeneſs, Wheezing, and other Diſeaſes of the Breſt and Lungs; prepared and ſold by the Author. Price 2 Shillings a Box, each Box containing 9 Pills.

An Ephemeris of the Cœleſtial Motions and Aſpects, Helio-centrick and Geocentrick, for the Year 1696; Calculated *De Novo*. With a compleat Table of Houſes, with Right and Oblique Aſcenſions to every Degree of the Ecliptick, the Sun's true Declination from correct Obſervations. The Eclipses of *Jupiter's* Satellites, whereby the Longitude of diſtant Places is eaſily determined, &c. The whole being uſeful to all Aſtronomers, Aſtrologers, Mariners, and thoſe that delight in the Art of Shadows, for making of Sun-Dials. By *George Parker*, Philomath, and ſold at his Houſe, at the *Blew Ball and Star* in *Salisbury-Court*, London, and by moſt Bookſellers. Price 6 Pence.
